

## Control Room Team Excellence - A Simulation

This course is designed to enhance your skills in managing complex problems and crisis situations in a controlled and safe environment.

Through immersive simulations in our control room, along with access to a diverse range of machines and a fully equipped data center, you'll gain practical experience that prepares you for real-world challenges.

Located at the heart of Denmark, FMS offers a wealth of technical resources that serve as support throughout the training. If you're looking to equip yourself and your colleagues with the tools to confidently navigate unforeseen circumstances, this is the ideal course for you!

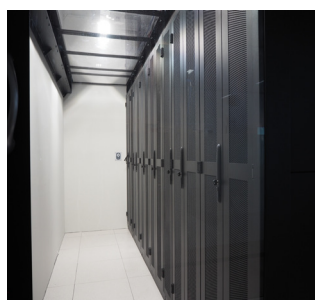

### Target audience:

Control room professionals, particularly those in data center and energy supply roles, will benefit greatly from this course.

It is designed to enhance you and your teams skills in a control room environment in the following ways:

- Improved knowledge in control room theory and crisis management skills
- Ability to adapt effectively under pressure
- Proficiency in resolving issues not covered by existing protocols
- Enhanced quick-thinking abilities to prioritize essential tasks and eliminate time-wasting activities
